About us

Our claim is to offer our customers the highest possible quality at a fair price - out of love for the automobile and motor sports.

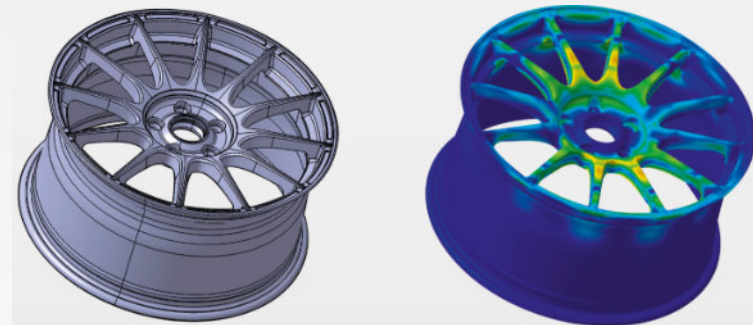

This is why the PROTRACK wheel brand was created in 2017. Here, the enthusiasm and passion of PROTRACK GmbH are fused with the know-how and meticulousness of a renowned design and development office to create light and stable light alloy wheels.

Wheels that not only give a lot of pleasure in motor sports, but also in road traffic due to their TÜV approval.

„The DNA of a light alloy wheel is already determined in the early design and development phase.

It goes without saying that our development and engineering office, with over 25 years of international motorsport experience, uses state-of-the-art software to achieve the optimum combination of strength and weight for each individual wheel."

"Our goal is to always offer our customers the best product.

If the market cannot provide this, we have to develop this product ourselves. The PROTRACK wheels brand was born from this claim."

Christoph Penisch
Managing Director PROTRACK GmbH

Y5 flow formed

The brief for the development was clear: A Y-spoke wheel that would be instantly recognisable as part of the PROTRACK family. And we have achieved this in impressive form. The Y5 combines design elements of the well-known and popular ONE wheel and interprets them in a new way. Initially developed as a direct fitment for the new BMW M models, further applications and sizes will follow.

Available from Q3/2024

dimension	in stock	wheel load kg	bolt pattern
10.5 x 19	~ Q3/2024	640	5x112
11.0 x 19	~ Q3/2024	640	5x112
11.5 x 19	~ Q3/2024	640	5x112
12.0 x 19	~ Q3/2024	640	5x112
